Application of Senior Project Manager Position, ADAX

Dear Sir / Madam,

I am writing to apply for the Senior Project Manager Position, ADAX which is published from MDEC.

In the year of 2012, I was requested to join HP Company immediately by one of the senior manager in Business & Analytic division. HP has the initiative to heavily invest in 'New Style of IT' businesses, which included Big-data initiative, Security, Meaning-based Computing and Cloud. I am acting as one of the pioneer in assisting the manager to drive the Big-data Initiative at HP Cyberjaya campus. In 4 years, I have been working as project manager, delivered 9 projects; successfully turning 2 projects which is in red status to green and delivered. I has worked as Data Scientist contributed effort in business intelligent projects, working as innovation lead in building up the employee capabilities in big-data technologies such as Hadoop, Hive, HBase, Kafka, Spark and etc. I have been working with different group of people in the company in delivering Hadoop-based PoCs. I have published 6 white papers and one of the papers has received center-wide top paper awards as well as the HP CIO Recognition on Outstanding Idea Award.

Before joining HP, I was attached with MIMOS, working as Staff Researcher in Artificial Intelligent lab, contributing effort in developing Semantic Technology Platform. The role & responsibility is to R&D on Semantic-based intelligent software components, developed prototypes and systems demo to show the capabilities of semantic technologies; in solving practical problems and driving the solution into a marketable product. Besides, I was also helping in organizing 2 AI conferences, taking up the role as chair in multiple sessions. In the 3 years I was attached with MIMOS, I have successfully filed 5 patents and published 8 papers.

I completed my Master Studies in Computer Science, majoring in AI and High Performance Computing in 2004. I started my career as software engineer in Intel Cyberjaya. I decided to quit Intel and become an entrepreneur in Machine Vision domain in 2006. I was involved in multiple roles such as business development manager, software manager, solution architect and developer in a local startup company. I have successfully delivered 3 solutions to the customer as well as successfully delivered 3 government grants.

In a nutshell, with the experience working in multiple MNC, entrepreneurship, research as well as industries domain I gained, especially in the big-data and data science knowledge; I am passionate in contributing efforts to build a better nation especially in ICT sector. The position and ADAX program is totally suite my career goal. It is more meaningful if I would able to contribute my daily time with a group of passionate, IT professionals in bring our nation to a better tomorrow. I wish I have the chance to explore further on this position.

Looking forward to talk to you.
Last but not least, I would like thank you for your time and consideration.

Your sincerely,
Sieow Yeek, Tan (SY, Tan)
